

FILTERING FLASK (W021)

Category: Lab Tools

Product Code: W021

Category: LAB TOOLS

Sub-Category: GLASSWARE

-
- A filtering flask in engineering testing laboratories is used to hold liquids during filtration processes. It is typically used with a vacuum pump to create suction, which

speeds up the filtration of liquids through a filter paper, ensuring the separation of solids from liquids in various chemical or material testing procedures.

ORDERING INFORMATION

Item	Code
FILTERING FLASK - 100 ml	W021G100H
FILTERING FLASK - 250 ml	W021G250H
FILTERING FLASK - 500 ml	W021G500H
FILTERING FLASK - 1000 ml	W021G01KH
FILTERING FLASK - 2000 ml	W021G02KH

Keywords: filtering flask, W021 filtering flask, ALFA Testing Equipment, vacuum filtration flask, laboratory glassware, material testing equipment, engineering lab tools, liquid filtration apparatus
