

MOH'S HARDNESS KIT (G772)

Category: Lab Tools

Product Code: G772

Category: LAB TOOLS

Sub-Category: LAB TOOLS

- A Moh's hardness kit in engineering testing laboratories is used to measure the hardness of materials, such as minerals or rocks, based on their ability to resist scratching. The kit

includes a set of reference minerals with known hardness values, allowing accurate determination of material hardness for geological or material testing.

ORDERING INFORMATION

Item	Code
MOH'S HARDNESS KIT	G772X001H

Keywords: Moh's Hardness Kit, G772 hardness kit, ALFA Testing Equipment, mineral hardness testing, rock hardness measurement, geological testing tools, material hardness kit, engineering lab equipment
