

PH METER (G705)

Category: Lab Tools

Product Code: G705

Category: LAB TOOLS

Sub-Category: LAB TOOLS

-
- A pH meter in engineering testing laboratories is used to measure the acidity or alkalinity of materials, especially in soil and water testing. It helps assess chemical

properties that affect material behavior, ensuring compliance with standards and supporting accurate analysis for construction and environmental decisions.

ORDERING INFORMATION

Item	Code
PH METER (Bench Type)	G705X001U
PH INDICATION PAPER	G705X002H
PH METER (Pocket Type)	G705X003B

Keywords: pH meter, G705 pH meter, ALFA Testing Equipment, soil pH tester, water pH meter, bench-type pH meter, pocket pH meter, pH indication paper, acidity measurement tool, alkalinity tester, lab pH meter, environmental testing equipment, construction material testing, chemical property analyzer
